## TECHNICAL SKILLS

- Software Development
- Mobile Development
- Project Management
- Cloud Architecture
- Programming

## PROGRAMMING

### LANGUAGES AND TOOLS

- Dart, Flutter
- Kotlin
- C#
- Python
- TypeScript
- Node.js, Express.js
- Unity
- Git
- Firebase
- Figma
- Adobe Photoshop
- WordPress

## CORE SKILLS

- Leadership
- Effective Communication
- Problem Solving
- Team Collaboration
- Flexibility, Agility and Adaptability
- Resource Management

## PROFILE SUMMARY

I am a dedicated and ambitious IT graduate from PHINMA University of Pangasinan, specializing in mobile game and application development. With a strong foundation in Dart, Kotlin, C#, and Python, I actively pursue new challenges to enhance my skills and broaden my experience. My focus is on developing engaging games and mobile applications that provide seamless functionality and deliver captivating user experiences.

## EDUCATION

### PHINMA University of Pangasinan

Bachelor of Science in Information Technology

Major in System Development

2021 - Present

- HK Scholar

## WORK EXPERIENCE

### PIXELHUB DESIGN + DIGITAL AGENCY - Internship

GRAPHIC DESIGNER (January 16 2025 - April 16 2025)

#### Calasiao LGU Website

WordPress | Figma

As part of a team project, I took part in designing and developing the official website for the Calasiao LGU. I individually designed several wireframes to outline the site's structure, layout, and user flow. We used WordPress to develop the site, ensuring it was easy to navigate and manage. One of the main things we did was integrate the LGU's Facebook posts, which we each gathered and embedded into the site individually.

#### DOT Region 3 Tourism Website

Figma | Figma Plugins | Figma Community

I worked on designing a wireframe for the DOT Region 3 Tourism website using Figma. I collaborated with my team throughout the design process, drew inspiration from the Figma Community, and used various plugins to streamline the workflow and enhance efficiency.

## MAJOR PROJECTS

### Stack IT

#### Capstone Project 2023 - 2024

Unity Engine | C# | LootLocker

I led the development of an engaging casual game designed to challenge players to stack blocks as high as possible, testing their reflexes and precision. The game uniquely incorporates various areas within PHINMA University of Pangasinan, providing players with an immersive and familiar experience. As the project lead, I guided the development process from concept to execution, ensuring that the gameplay was both fun and challenging.

### **Find My Dorm**

#### **Junior Final Project 2023**

Flutter | Dart | SQLite

Led the development of a location-based application designed to assist students and individuals in finding suitable dormitories in the Pangasinan area.

### **PCRealm**

#### **New Venture Creation 2024**

Figma | React | TypeScript | Babylon.js

Proposed and developed a web system that helps users build their ideal PC setup within budget constraints. The application features an interactive simulation tool, allowing users to drag and drop components, check compatibility, and estimate performance level.

---

## **PROFESSIONAL CERTIFICATES**

- **Employability Skills - JobReady (Wadhwani Foundation)**
  - Completed at September 10, 2024
- **Web Development (Solo Learn)**
  - Complete at October 23, 2023
- **Image Editing Using Photoshop Training (ICT Literacy and Competency Development Bureau)**
  - Completed at June 03, 2022
- **Redefining Web Security: Innovative Captcha Alternative (Bitstop Network Services)**
  - Completed at May 19, 2023
- **Cybershield: Safeguarding Your Digital World (University of the Philippines)**
  - Completed at May 03, 2024
- **Introduction to Graphic Design**
  - Completed at March 21, 2025
- **Certificate of Completion ( ON THE JOB TRAINING at Pixelhub Creative Design Studio)**
  - Completed 500 hours from January 16, 2025 - April 16, 2025
